Professional Summary

Results-driven analytics professional with more than 3 years of experience in aviation analytics, with a proven track record of driving revenue growth through data-driven pricing strategies and analysing market trends. Skilled in SQL, Python, Machine Learning, and BI tools, with expertise in statistical analysis and predictive modeling. Passionate about leveraging data insights to enhance operational efficiency and profitability.

Experience

Senior Analyst: Planning and Revenue Management

07/2022 – Present

IndiGo – Gurugram, Haryana, India

- Implemented pricing strategies across key international markets such as Dubai and Thailand, **resulting in 15% YoY growth in revenue** despite growing competition and industry capacity.
 - Developed flight management worksheets and dashboards, improving decision-making and **reducing manual work hours by 30%**.
 - **Analyzed routes and identified potential opportunities** to adjust schedules to target specific connections, and potential new routes for improved profitability.
 - **Collaborated cross-functionally** to support deployment of the new **RM system (Kambr/SRM Flex)** aligned with IndiGo's business needs and optimize existing processes
 - **Recognized with awards** including *Debutant of the Year (2022–23)*, multiple *Employee of the Month* honors, and cross-departmental accolades for work excellence and professionalism.
-

Projects

Disease Prediction WebApp – [[Live Link](#)] [[Git Hub Link](#)]

- Built an **ML model to predict 42 diseases** with more than **97% accuracy** using Logistic Regression and hyperparameter tuning (GridSearchCV) on 132 binary symptom features
- Improved model efficiency by reducing features through **VIF analysis and redundant feature elimination**
- Developed a **Flask-based web app** with a real-time symptom search bar and modern UI; containerized with **Docker and deployed on Hugging Face Spaces**.
- Addressed model training and deployment issues (Sklern warnings, dependency conflicts) to ensure seamless integration and robust performance.

Waste Management Prediction – [[Git Hub Link](#)]

- Secured **second runner-up** position in the hackathon project.
- Developed an **End-to-End ML Pipeline**: Built a Python-based system to preprocess waste data, train (**Random Forest, XGBoost, Gradient Boosting**) and predict recycling rates for Indian cities, integrated via modular scripts.
- Engineered Features & Tuned Models: Created features like landfill distance, managed missing data, and optimized models for accuracy despite limited datasets.
- Managed Project & Version Control: **Integrated pipeline components**, documented with a README.md, and deployed using **Git/GitHub**.

Airline Performance Dashboard – [[Render Link](#)] [[Git Hub Link](#)]

- Developed and deployed an **interactive web dashboard** for real-time visualization of key airline performance metrics (Revenue, Passenger Count, ASK) across various regions and markets.
- Processed and transformed large airline datasets using **Pandas** to enable real-time, drill-down analytics.
- **Leveraged Plotly** for dynamic, responsive charts, enabling year-over-year analysis and data-driven insights.

Education

Ramanujan College, University of Delhi

BA(H) Economics

CGPA : 8.784

Subjects Studied: Statistics, Econometrics, Mathematics, Macroeconomics, Microeconomics

2022

Delhi

Certifications

Data Analytics Certification by PW Skills

- Advancing data analytics proficiency through comprehensive PW Skills certification program, mastering Python, SQL, Machine Learning and data visualization techniques
-

Skills

- **Technical Skills:** Data Cleaning, EDA, Statistical Analysis, Machine Learning, Data Visualization & Storytelling, Feature Engineering, Time Series Analysis, Revenue Management
- **Programming Languages:** Python, SQL
- **Tools:** Advanced Excel, Git/Github, Power BI, Tableau
- **Frameworks:** Flask, Scikit-learn, Streamlit
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Plotly, Statsmodels, SciPy, XGBoost
- **Soft Skills:** Communication, Analytical Thinking, Collaboration, People Management
